

Data Discovery

Your Trip to Discovery

Data Discovery You shouldn't have to work so hard to identify, view, and present information to meet your business needs. IPeople understands the challenges of reporting against complex disparate system and has created a business model to provide affordable report writing services, saving your staff both time and sanity! Our data continuity services include:

Report Writing

As technologies change so do the needs of your hospital. Your IT department is seeing a rise in the demand for detailed reporting from your HCIS system as well as other ancillary systems. Staffing your hospital with people who have HCIS proprietary knowledge and report writing skills is difficult, expensive, and time consuming.

Need a specific report and unsure of how to get started? Our comprehensive knowledge of HCIS systems supplies your staff with a reliable extension of your organization to deliver complex reports quickly and consistently. IPeople understands the pressing needs of hospitals for accurate and timely reporting. We work hard to exceed your expectations.

Training

Our trainers have vast experience training users of varying skillsets on NPR and M-AT Report Writing, including fragment and macro development. For over a decade, IPeople has been providing industry recognized training on the MEDITECH report writing solutions across all platforms.

- Customized agendas are available to help you reach specific goals
- Beginner, intermediate, and advanced levels
- Remote or onsite training

IPeople Account Analysis Wizard

Go from MEDITECH to Excel in 30 seconds! Streamline revenue collections and gain a comprehensive view of patient financials in a fraction of the time. Report on the data that you truly need and in a useable format. Pull data from your HCIS system real-time (no NPR reports!), combining information from Abstracting, Billing/Accounts Receivable, Admissions, and existing spreadsheets into one Microsoft Excel file.

HEAR IT FROM THE CUSTOMERS

"You have to try these guys out! Nothing but exceptional, professional products and services. I had Interface People come onsite to train my IT staff on NPR report writing. It was absolutely wonderful. The instructor was an NPR wizard."

-Regis Thornton, Ashland Community Hospital

"Phenomenal product! The IPeople Account Analysis Wizard (IAAW) is very intuitive and extremely easy to use. My work load has been reduced tremendously. Reports that used to take up to an hour now take 2 minutes! We also believe this product will significantly reduce the number of outsourced NPR reports."

-Owen Huett, University of Texas Medical Branch
