IPeople Partners with Plexus Technology Group to Expand Medication Management Technology

DALLAS, Tx., July 19, 2018 --Interface People (IPeople), a premiere healthcare integration provider , is pleased to announce they are working with Plexus Technology Group, LLC (Plexus TG), a fully KLAS-rated, market-leading, best-of-breed provider of anesthesia information management systems (AIMS), , to offer a discrete controlled-substance reconciliation feature that is available to all Plexus TG clients. This powerful functionality provides advanced integration from MEDITECH's Pharmacy module (PHA) to Plexus TG's anesthesia EMR, Anesthesia Touch™, including formulary synchronization.

Plexus Technology Group
Plexus TG recognizes controlled-substance reconciliation is a major responsibility shared by pharmacists and anesthesia. By integrating dispensing information with drug administration information, reconciliation is easier for all users. Anesthesia Touch can remind providers in real time to document drugs, and Pharmacy can see the combined information in complete medication reconciliation reports. Sharing data allows all users to compare the controlled-substances that were dispensed from the medication cabinets with the given amounts recorded in an AIMS.

In addition, Plexus TG and IPeople will continue to offer enhanced bi-directional integration from MEDITECH's EHR to Plexus TG's anesthesia EMR, Anesthesia Touch, which includes preoperative data import. This functionality of preoperative data into MEDITECH and discrete data from MEDITECH is available for customers that are on MAGIC, Client/Server (C/S) and all 6.x versions including EXPANSE.

"We are excited to work with IPeople to expand our capabilities and provide another option for controlled-substance reconciliation to our extended client base. Working together on the preoperative imports will significantly enhance the integration capabilities between Plexus TG's Anesthesia Touch software and our client's MEDITECH EHR systems," comments Tony Mira, CEO of Plexus Technology Group.

About IPeople

As a premiere healthcare integration provider, IPeople combines innovative solutions with in-depth industry knowledge for smarter, easier access to data. IPeople's HCIS expertise takes them to the next level of building reliable and efficient bi-directional interfaces that organizations can trust. For the last 15 years, IPeople has earned a solid reputation for providing robust and reliable interface solutions to the healthcare community. The IPeople team is committed to continually improving the quality and efficiency of your experience with your data. For more information, please visit www.ipeople.com.

About Plexus Technology Group

Plexus Technology Group, LLC, a subsidiary of MiraMed Global Services, is a leading provider of anesthesia information management and medication management systems. Anesthesia Touch™ is a full-featured AIMS for both Windows and iOS platforms that supports concurrent charting and automatically records physiological data. It is easy to use, provides comprehensive anesthesia documentation and is certified as a full EHR for meaningful use. Pharmacy Touch™, a modular add-on to Anesthesia Touch, automates controlled substance reconciliation, eliminates duplicate documentation, reduces drug errors and delivers charge capture and decision support at the point of care.
