

IPeople Eases Acquisition Worries with Incentive Offering

Introducing "Make the Switch". For a limited time, organizations looking to move to new solutions in replace of existing solutions can switch to IPeople with a 25% discount off of licensing fees.

DALLAS, TX – Acquisitions occur and with every acquisition there is change that can often lead to uncertainty for the existing customers. Most recent, Iatric Systems announced that they were acquired by Harris Healthcare. IPeople, a premiere healthcare integration provider, understands the concern that can result from such events and as a result, IPeople is offering the ability to switch to comparable IPeople solutions at a 25% discounted rate.

"We wish Iatric the best, it is completely natural to feel a little nervous when a change like this hits the market, but IPeople is poised and ready to fulfill any needs healthcare organizations may have, including interface work and report writing," said COO Jenny Blue.

"We understand how transitions can come with uncertainty or doubt," said IPeople CEO, Gary Armfield. "We just want organizations facing this uncertainty to know that we are here to take care of them. If you've ever considered transitioning or you're concerned with Iatric's future direction, there is no better time than now to make that decision."

IPeople's customer support team will be available 24/7 to address any concerns or questions.
