

Interface People (Ipeople) and Novaseek Research Announce Partnership

The new partnership will provide Novaseek's CDNR platform users with an improved experience while expanding Interface People's customer-centered health IT products, services and solutions to compound growth plans.

Dallas, TX – December 11, 2017 – Interface People (Ipeople), a premiere healthcare integration provider and Novaseek Research, Inc., a health IT for life sciences organization, today announced a partnership to enable easier integration of Novaseek's Clinical Data Network for Research (CDNR) platform into hospital/clinical IT systems. Through this collaboration, Novaseek's hospital and lab partners will gain access to on-site installation consultants who will install the CDNR platform without disruption of normal workflow.

"Partnering with Novaseek builds on our ongoing commitment to continually improve the quality and efficiency of experience with clients' data," said Jenny Blue, CEO and Partner of Ipeople. "Ipeople is excited to be able to assist organizations with clinical research by helping streamline the integration between the HCIS system and Novaseek's powerful CDNR solution."

"Our partnership with Ipeople makes Novaseek's CDNR platform even easier and simpler to install by removing the implementation burden from the hospital or lab's IT personnel, freeing them to focus on day-to-day operations," said Andrei Soran, chief executive officer, Novaseek Research. "By streamlining this process, Novaseek's hospital and clinical lab partners are able to begin contributing to research and generating revenue with greater ease and speed than ever before."

About CDNR

Novaseek's award-winning novel platform, the Clinical Data Network for Research (CDNR), easily interfaces with hospital data sources in real time and enables researchers to define patient cohorts through population analytics and to access consented biospecimens and clinical data to advance translational medicine, clinical development and observational studies. Hospitals and clinical laboratories are enabled to participate in clinical research at the community level while generating additional revenue.

About Novaseek

Novaseek Research, Inc. is a game-changing health IT for life sciences company that provides turn-key, dynamic access to real world clinical data and biospecimens from a network of healthcare organizations. We envision a world where a clear understanding of real-world patients is central to every stage of life sciences research and drug development.
